

Environment Policy

The Environment Operations Act 1999 requires all organisations and individuals to take environmental protection seriously. In response to this Act, Cerno is committed to environmental protection, adopting strategies to ensure that all staff continually reduce the risk of causing harm to the environment.

To comply with this policy, Cerno will exercise the appropriate degree of diligence in regard to the Protection of the Environment Operations Act 1999.

Our Environmental Management System (EMS) is based on the requirements of AS/NZS ISO 14001: 2016.

Objectives are:

- set and review environmental objectives and targets based on the nature, scale and environmental impacts of our Group's activities, products and services
- commit to comply with environmental legislations and other environmental requirements
- ensure continual improvement, prevention of pollution and the conservation of resources
- communicate this policy to all persons working for or on behalf of the company
- make this policy available to the public

We manage our processes, materials and people in a way that will reduce the environmental impact of our business activities.
